(54) Title: **DOMESTIC MULTIMEDIA TRANSMISSION METHOD AND SYSTEM**

(57) Abstract: There is provided transmission of MPEG2 audio and data over an in-house wireless network using the 802.11b standard with a Home Media Centre to tune and store a number of TV and audio streams for distribution to a number of client devices throughout a home. A transrater reduces the bit rate for use in the limited bandwidth wireless communications network. Prioritisation of the data packets for resending is made according to content format and/or age.
